

International Standards of Tuberculosis Care

Author: Tuberculosis Coalition for Technical Assistance

Publication Date: 2006

Format: Report

Physical Description: 60 p.: col., ill., tables, refs.

Language: English

Abstract:

Developed by the Tuberculosis Coalition for Technical Assistance (TBCTA) with funding from the United States Agency for International Development (USAID), the International Standards for Tuberculosis Care describe a widely accepted level of care that all practitioners, public and private, should seek to achieve in managing patients who have, or are suspected of having, tuberculosis. The standards are intended to facilitate the effective engagement of all care providers in delivering high-quality care for patients of all ages. This material is affiliated with the World Care Council's "Patients' Charter for Tuberculosis Care".
